The technology-driven start ups of the MeVis Group. Lessons for R&D management.

Prof. Dr. Heinz-Otto Peitgen

MeVis Research GmbH, Universitaetsallee 29, 28359 Bremen, Germany
Center of Complex Systems and Visualization CeVis, University of Bremen
Florida Atlantic University, Boca Raton

MeVis Group

The MeVis Group in Bremen, founded 1995, develops disease oriented software solutions for clinically relevant problems in image based medicine. In close cooperation with a worldwide network of clinical partners more than 150 employees work on novel products for the diagnosis and therapy of cancer as well as cardiovascular, neurologic, and pulmonary diseases.

The MeVis Group is covering the entire innovation chain. Prototypical solutions produced by the non-profit R&D center MeVis Research are developed into marketable products or services by the commercial spin-offs MeVis Technology, MeVis BreastCare, MeVis Diagnostics, and MeVis Distant Services as well as by other international providers of medical technology. The MeVis Group offers worldwide leading solutions for breast cancer diagnosis and liver surgery planning.

MeVis Group wins Founders Prize 2006

The MeVis Group, Bremen was awarded with the German Founders Prize 2006 in the category Visionary for their success in developing novel and excellent solutions in medicine. The MeVis Group had been selected among more then 1.000 nominees. The founders Prof. Heinz-Otto Peitgen and Dr. Carl Evertsz received the prize in the TV studio of the ZDF in Berlin on Sep 12, 2006.
